

SECTION 1065

CONCRETE TRAFFIC BARRIER DELINEATORS

1065.1 Scope. This specification covers concrete traffic barrier delineators for use in highway construction.

1065.2 Body. The delineator body shall be manufactured from high-impact, weather-resistant plastic. The final body thickness shall be a minimum of 0.08 inch (2.03 mm). The face on which the retroreflective sheeting is to be placed shall have a nominal dimension of 3 1/2 by 4 1/2 inches (89 by 114 mm).

1065.3 Retroreflective Sheeting. The retroreflective sheeting shall be an approved MoDOT Type 5 sheeting in accordance with [Sec 1042](#). Retroreflective sheeting shall be permanently affixed to the body of the delineator, having a minimum reflective surface of 12 square inches (7740 mm²). Manufacturer certification shall be provided for delineator sheeting to be used on Type A, B, C and D concrete traffic barriers. For temporary concrete traffic barrier delineators, an alternate retroreflective material may be used with approval from the engineer. The alternate retroreflective material shall meet the dimensions required in this specification.
